

BEE SEASON

The Hackettstown Pool is committed to Patron Safety above all other concerns. To that end, we provide the following information:

TYPES OF BEES

- 1.) Local - These Bees actually nest near the Facility
- 2.) Travelers - These Bees travel as far as 3 miles to feed and could be nesting anywhere within that radius

NESTING LOCATIONS

- 1.) Holes in the ground
- 2.) Cracks in the sidewalks and/or other masonry
- 3.) Virtually any dry area with a small access hole
- 4.) Visible external nests in shrubs, under building eaves, etc.

HOW CAN YOU HELP

- 1.) Be Cautious, Don't agitate Bees
- 2.) If you see Bees entering a nesting location, report the location to the manager - We will treat those locations at night.
- 3.) Clean up any spills that occur while eating at the snack bar & use trash cans
- 4.) Don't bring food & drinks outside of the snack bar area.
